

I endorse the petition. It is common knowledge that Amateur Radio equipment is being illegally utilized by person(s) without the required FCC license. This equipment is available to "anyone" via the internet, radio shack type stores or at flea markets. I believe the petition is a first step to ensure that equipment is not sold without the buyer producing a valid Amateur Radio License and proper accompanying identification. I believe that you will find the majority, if not all Radio Amateurs, strongly endorsing this requirement.
